# HIGH VOLTAGE PRECISION RESISTORS HPR 969

This series of high voltage precision resistors was developed to simultaneously handle high voltages while providing excellent stability. The reliability and precision in recording measurement values are just two of the outstanding features of this type series. At the same time, the resistors also offer high load capacity, making them particularly well-suited for applications in energy transmission, electrostatics and as protective resistors in electric drives.

- High load capacity
- Good stability
- Very low inductance

# NEW BY METALLUX: POWER AND PULSE RESISTORS

The type series PLR-T0 with three additional performance classes will augment the established Metallux range of performance film resistors. The familiar design with new material pairings offers even more capacity and dielectric strength in the narrowest spaces.

In the new type series PCR particularly low impedance high voltage pulse resistors are available. The resistance value and pulse energy from three different diameters and variable lengths can be combined.

### POWER RESISTORS OF THE TYPE SERIES T0

Model	Max. operational voltage	Power without cooling	Power with cooling	Resistance values	Tolerance
T0-126	300V	2W	30W	1R0 – 10K	5%, 10%
T0-220	300V	3.5W	60W	1R0 – 10K	5%, 10%
T0-247	300V	6W	120W	1R0 – 10K	5%, 10%

### PULSE RESISTORS OF THE TYPE SERIES PCR
