

PL220 Automated Oiler

Ideal for High Resolution Screening

Features

PRIOR
Scientific

The PL220 Automatic Oiler from Prior Scientific is the ideal tool to take your high resolution screening to the next level. Perfect for applications such as cytology or cytogenetics, the PL220 Automatic Oiler provides a highly controlled automatic delivery for dispensing immersion oil onto the surface of the slide. The PL220 allows for the use of high resolution, high numerical aperture oil immersion objectives. The PL220 can be fitted to all leading microscopes for use with the Prior slide loader or it can be used as a stand alone system for OEM applications.

Features of the PL220 Automated Oiler:

- Ease of use
- Simple software integration
- Compatible with upright or inverted microscopes.
 - Stand alone control unit
- USB (HID or Virtual COM), RS232C interfaces
- Suitable for customized & OEM applications
