

### MASTERPIECES MADE IN GERMANY

### Flow Monitor

# RMU-B

### OVERVIEW

#### Operation

- Float measuring principle

### **Application**

- Cooling systems and cooling circuits
- Mechanical engineering
- High pressure cleaners
- Research & Development

#### **Features**

- Universal orientation
- High reliability
- Low sensitivity to dirt
- Infinitely variable switch point adjustment by operator
- High pressure resistance
- Threaded connection, special thread on request

#### Installation information

- The operating instructions for RMU-B Module BASICS must be observed!
- Download: www.meister-flow.com

### OPERATING DATA

| Operating pressure, max. | 250 bar (Brass version)  |
|--------------------------|--------------------------|
| Pressure drop            | 0,025 - 0,3 bar          |
| Temperature, max.        | 100 °C (optional 160 °C) |
| Measuring accuracy       | ±10 % of full scale      |

### ■ MEASURING RANGES

| RMU-B12 | 5,5 - 10                                       | 87 – 159  |     |  |  |  |  |
| RMU-B18 | 8,5 - 15,5                                     | 135 – 245 |     |  |  |  |  |

<sup>(1)</sup> The specified measuring- / switch ranges are valid for water having a density of 1.00 kg/dm³, vertical installation of the device and flow direction from bottom to top.

Other installation positions or deviation from the operating densities will increase the measurement error specified in the data sheet.

Operating density for water at 20  $^{\circ}\text{C}$  and 1.013 bar (absolute value): 1.00 kg/dm³.

Upon request, special scales for deviating media, different operating conditions and installation positions (only for devices which can be installed in any position) are available.

The specified switch values are switch-off points, i.e. switch values by decreasing flow.

Other measuring-/switch ranges are available upon request.
