

TELIS 8 0 0 0

To answer to every need JM Concept has designed a new range named TELIS:
TELIS 8000 range **frequency input**, characterized by:

- Its graphic screen display, and its joystick make it an user-friendly and easily programmable device.
- Its USB front face socket enables a very simple programmation with PC.
- TELIS 8000 is designed in JM concept case unplugable from its DIN RAIL wiring base
- Its cutting edge technology allows TELIS 8000 to have exceptional characteristics.
- Its output configurations, fitted to market, allow to give solutions to all applications.

TELIS 8000

TELIS 8000 is a frequency input transmitter.

TELIS 8000 offers 1, 2 current or/and tension outputs, 1, 2, 4 relay outputs. T E L I S 8000 has also a RS485 modbus and an USB front face socket allowing a very simple programmation with PC. The free software SETLINE enables a very simple product configuration, and to save configurations, etc....

TELIS 8000 is designed in 22.5mm or in 45mm width case, with or without graphic screen display, and joystick, according to references.

TELIS 8000 has several outputs solutions :

TELIS 8000 INPUTS & OUTPUTS

INPUTS	OUTPUT		COMMUNICATION
	ANALOGUE	RELAYS	
Frequency Input	1 Current or Voltage output	1 Relay 1RT	RS485 Modbus on Screw terminals
	2 isolated Current and/or Voltage output	2 Relays 1RT or 1RT & 1T 4 relays 1T	USB socket on front face

TELIS 8000 : FUNCTIONS

DISPLAY	LCD graphic screen display.
INPUT DISPLAY	LCD graphic screen enables display input in Hertz and in programmed value.
OUTPUT DISPLAY	LCD graphic screen enables to display, outputs programmed value or in percent, it displays also alarms status.
PROGRAMMATION	Programmation with 5 ways JOYSTICK on front face.
INPUT	Input: Frequency square, trapézoïdal, sinusoïdal, relay contact.
OFFSET	OFFSET setting.
SIMULATION	Simulation function allows action concerning analogue, relays, digital, outputs (RS485 & USB) and the display separately from the input and without disconnecting input or outputs.
OUTPUTS LIMIT	Open the possibility of outputs limitation – High Limitation or Low Limitation.
MEMORISATION	Open the possibility of memorisation the last measured value in default case.
ALARMS RESET	Separately on each alarm.
ALARMS MEMORISATION	Separately on each alarm.
USB	USB front face socket enables to connect with PC (via USBLINE) for a very simple device configuration.
MAPPING	Modbus address mapping enables to choose your own parameter address.
OUTPUT SCALE FACTOR	Enables to provide a magnifying effect on input 1 in manual or in automatic calibration.

TELIS 8000 : FUNCTIONS

MINI/MAXI MEMORY

Maxi and mini measurement value memorizing

SAFETY SENSOR

Shows sensor break display, on digital output on analog output(s) (by entering drop out value), and on relays outputs, independent for each output

THRESHOLD

Simple mode or band-mode with positive or negative safety.Threshold, hysteresis and temporization adjustment (separately from the rise or the fall). Direct access to the thresholds. Alarm memorizing and alarm deleting.

OTHER FUNCTIONS

Cut OFF ; Résolution ; Comma ; Filtering ; Contrast setting ; Programmation mode ; Display light off ; Joystick lock.

COMMUNICATION

All transmitters have a bidirectional communication RS485, so it is possible to recover the measurements and to send them in digital, but it is also possible to configurate and to drive the transmitter. This communication is doubled with USB socket on front face.

TELIS 8000 : CHARACTERISTICS

FREQUENCY

Frequency range

Frequency square, trapézoïdal, sinusoïdal, relay contact

Level

2Hz to 1000Hz; 2Hz to 2000Hz; 500Hz to 10kHz; 1kHz to 100kHz
5/20 V; 20/45 V; 50/300 V

SENSOR SUPPLY

2 or 3 wires sensors – Sensor supply : 15V – 24mA max

CURRENT OUTPUT 1 / OUTPUT 2

Standard scales : 0/20mA ; 4/20mA

Standard scale : From 0 to 20mA

VOLTAGE OUTPUT 1 / OUTPUT 2

Standard scales : 0/10V ; +/-10V

Standard scale : From 0 to 10V

COMMUNICATION

USB on front face

RS 485 Modbus isolated from input and output 1

RELAY OUTPUT

Relays : 1 C/O ; 2 C/O ; 4 N/O ; 1C/O & 1 N/O

INPUT IMPEDANCE

1 MΩ

OUTPUT IMPEDANCE

Current output 1 & 2

< 1000Ω

voltage output 1& 2

> 4kΩ

RELAY OUTPUT

Relay 1C/O ou 1N/O : 2A/250Vac

Precision class

0.1

Analogue/Digital input conversion

24 bits

Digital/analogue output conversion

16 bits

Response time

<250ms

Thermal drift

< 50ppm

Current output residual ripple

< 20µA

Voltage output residual ripple

< 10mV

ISOLATION

Power supply / Input / Output

5000Vdc - 3750Vac, 50Hz, 1mn

Input / Output 1 / Ouptut 2

5000Vdc - 3750Vac, 50Hz, 1mn

Output 1 / Communication

5000Vdc - 3750Vac, 50Hz, 1mn

Output 2 / Communication

Without

TELIS 8000 : CHARACTERISTICS

POWER SUPPLY

Universal power supply 20Vdc /370Vdc & 80Vac /256Vac

Option 20Vac /60Vac

MAXIMUM CONSUMPTION

< 4VA

TEMPERATURE

Operating temperature -10°C /+60°C

Storage temperature -25°C /+80°C

PROTECTION INDEX

IP20

CASE

Black self-extinguible V0

TELIS 8000 : RANGE

TELIS 8000 is declined in two ranges:

- Transmitters with graphic screen display, programmation joystick, and USB front face socket.
- Transmitters without graphic screen display, nor programmation joystick, but with USB front face socket
